

EXT 1: Functions (Ext1), F1 Further Work With Functions (Y11) Inequalities (Ext1)

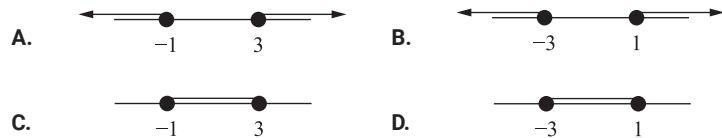

Teacher: Amreeta Sami

Exam Equivalent Time: 76.5 minutes (based on HSC allocation of 1.5 minutes approx. per mark)

Questions

1. Functions, EXT1 F1 2020 HSC 1 MC

Which diagram best represents the solution set of $x^2 - 2x - 3 \geq 0$?

2. Functions, EXT1 F1 2013 HSC 10 MC

Which inequality has the same solution as $|x + 2| + |x - 3| = 5$?

- (A) $\frac{5}{3 - x} \geq 1$
- (B) $\frac{1}{x - 3} - \frac{1}{x + 2} \leq 0$
- (C) $x^2 - x - 6 \leq 0$
- (D) $|2x - 1| \geq 5$

3. Functions, EXT1* F1 2004 HSC 1f

Find the values of x for which $|x + 1| \leq 5$. (2 marks)

4. Functions, EXT1* F1 2005 HSC 1e

Find the values of x for which $|x - 3| \leq 1$. (2 marks)

5. Functions, EXT1* F1 2012 HSC 11b

Solve $|3x - 1| < 2$ (2 marks)

6. Functions, EXT1 F1 2004 HSC 1b

Solve $\frac{4}{x + 1} < 3$. (3 marks)

7. Functions, EXT1 F1 2010 HSC 1d

Solve $\frac{3}{x + 2} < 4$. (3 marks)

8. Functions, EXT1 F1 2011 HSC 1c

Solve $\frac{4 - x}{x} < 1$. (3 marks)

9. Functions, EXT1 F1 2012 HSC 11c

Solve $\frac{x}{x - 3} < 2$. (3 marks)

10. Functions, EXT1 F1 2014 HSC 11e

Solve $\frac{x^2 + 5}{x} > 6$. (3 marks)

11. Functions, EXT1 F1 2019 HSC 11b

For what values of x is $\frac{x}{x + 1} < 2$? (3 marks)

12. Functions, EXT1 F1 SM-Bank 1

Find the values of x that satisfy the equation

$$x^2 + 8x + 3 \leq 0. \text{ (3 marks)}$$

13. Functions, EXT1 F1 SM-Bank 2

Solve $\frac{3}{|x - 3|} < 3$. (3 marks)

14. Functions, EXT1* F1 2010 HSC 2b

Solve the inequality $x^2 - x - 12 < 0$. (2 marks)

15. Functions, EXT1* F1 2016 HSC 11c

Solve $|x - 2| \leq 3$. (2 marks)

16. Functions, EXT1 F1 2015 HSC 11c

Solve the inequality $\frac{4}{x+3} \geq 1$. (3 marks)

17. Functions, EXT1 F1 2017 HSC 11c

Solve $\frac{2x}{x+1} > 1$. (3 marks)

18. Functions, EXT1 F1 2009 HSC 1d

Solve the inequality $\frac{x+3}{2x} > 1$. (3 marks)

19. Functions, EXT1 F1 2016 HSC 11e

Solve $\frac{3}{2x+5} - x > 0$. (3 marks)

20. Functions, EXT1 F1 2020 SPEC1 4

Solve the inequality $3 - x > \frac{1}{|x-4|}$ for x , expressing your answer in interval notation. (3 marks)

Worked Solutions

1. Functions, EXT1 F1 2020 HSC 1 MC

$$x^2 - 2x - 3 \geq 0$$

$$(x-3)(x+1) \geq 0$$

$$x \geq 3, \text{ or } x \leq -1$$

$$\Rightarrow A$$

2. Functions, EXT1 F1 2013 HSC 10 MC

In **A** and **B**, $x \neq 3$ but when $x = 3$,
 $|3 + 2| + |3 - 3| = 5$ is correct.
 $\therefore$ Not **A** or **B**.

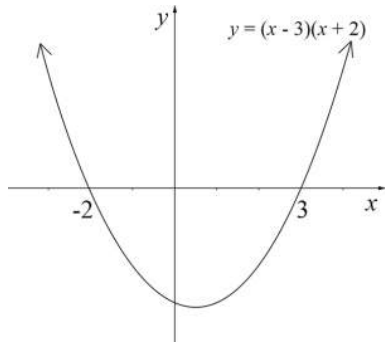

Consider **D**

$x \rightarrow \infty$ satisfies $|2x - 1| \geq 5$, but
 obviously not $|x + 2| + |x - 3| = 5$.

Consider **C**

$$x^2 - x - 6 \leq 0$$

$$(x - 3)(x + 2) \leq 0$$

True when $-2 \leq x \leq 3$.

In this range,

$$(x + 2) \geq 0 \text{ and } (x - 3) \leq 0$$

$\therefore$ We can write

$$|x + 2| + |x - 3| = (x + 2) - (x - 3)$$

$$= x + 2 - x + 3$$

$$= 5$$

$\therefore$ **C** has the same solution

$\Rightarrow$ **C** is correct.

♦♦ Mean mark 39%
COMMENT: Note that the quick
 elimination of **A**, **B** and **D** is
 sufficient to get to the correct
 answer without proving **C**
 (although we have done this in the
 solution).

3. Functions, EXT1* F1 2004 HSC 1f

Solution 1

$$|x + 1| \leq 5$$

$$-5 \leq x + 1 \leq 5$$

$$\therefore -6 \leq x \leq 4$$

Solution 2

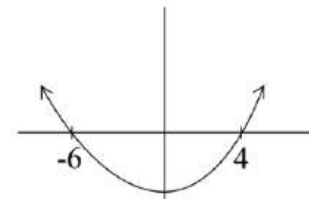

$$|x + 1| \leq 5$$

$$(x + 1)^2 \leq 5^2$$

$$x^2 + 2x + 1 \leq 25$$

$$x^2 + 2x - 24 \leq 0$$

$$(x + 6)(x - 4) \leq 0$$

$$\therefore -6 \leq x \leq 4$$

4. Functions, EXT1* F1 2005 HSC 1e

$$|x - 3| \leq 1$$

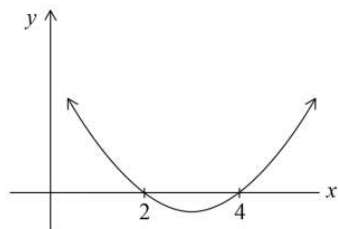

Solution 1

$$(x - 3)^2 \leq 1$$

$$x^2 - 6x + 9 \leq 1$$

$$x^2 - 6x + 8 \leq 0$$

$$(x - 4)(x - 2) \leq 0$$

$$\therefore 2 \leq x \leq 4$$

Alternative Solution

$$(x - 3) \leq 1 \quad -(x - 3) \leq 1$$

$$x \leq 4 \quad -x + 3 \leq 1$$

$$-x \leq -2$$

$$x \geq 2$$

$$\therefore 2 \leq x \leq 4$$

5. Functions, EXT1* F1 2012 HSC 11b

$$|3x - 1| < 2$$

$$3x - 1 < 2 \quad -(3x - 1) < 2$$

$$3x < 3 \quad -3x + 1 < 2$$

$$x < 1 \quad 3x > -1$$

$$x > -\frac{1}{3}$$

$$\therefore -\frac{1}{3} < x < 1$$

MARKER'S COMMENT: Note that both conditions must be satisfied! Dealing with negative signs and division for inequalities produced many errors.

6. Functions, EXT1 F1 2004 HSC 1b

$$\frac{4}{x + 1} < 3$$

Multiply both sides by $(x + 1)^2$

$$4(x + 1) < 3(x + 1)^2$$

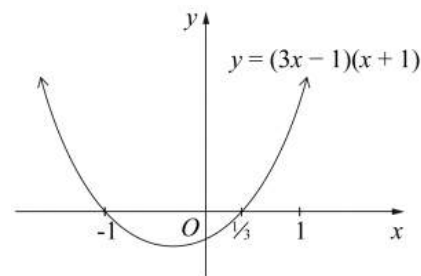

$$4x + 4 < 3(x^2 + 2x + 1)$$

$$4x + 4 < 3x^2 + 6x + 3$$

$$3x^2 + 2x - 1 > 0$$

$$(3x - 1)(x + 1) > 0$$

$$\text{LHS} = 0 \text{ when } x = \frac{1}{3} \text{ or } -1$$

From the graph,

$$x < -1 \text{ or } x > \frac{1}{3}$$

7. Functions, EXT1 F1 2010 HSC 1d

Solution 1

$$\frac{3}{x+2} < 4$$

Multiply b.s. by $(x+2)^2$

$$3(x+2) < 4(x+2)^2$$

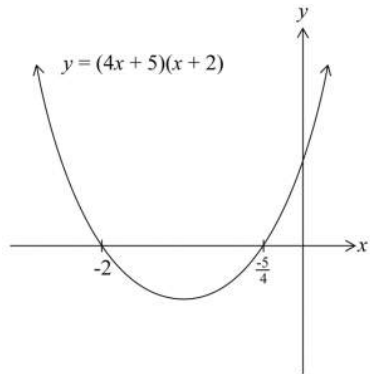

$$3x+6 < 4(x^2+4x+4)$$

$$3x+6 < 4x^2+16x+16$$

$$4x^2+13x+10 > 0$$

$$(4x+5)(x+2) > 0$$

LHS = 0 when $x = -\frac{5}{4}$ or -2

From graph

$$x < -2 \text{ or } x > -\frac{5}{4}$$

Alternate Solution

If $x+2 > 0$ (i.e. $x > -2$)

$$3 < 4(x+2)$$

$$3 < 4x+8$$

$$4x > -5$$

$$x > -\frac{5}{4}$$

If $x+2 < 0$ (i.e. $x < -2$)

$$3 > 4(x+2)$$

$$3 > 4x+8$$

$$4x < -5$$

$$x < -\frac{5}{4}$$

$\therefore x < -2$ (satisfies both)

$$\therefore x < -2 \text{ or } x > -\frac{5}{4}$$

8. Functions, EXT1 F1 2011 HSC 1c

Solution 1

$$\frac{4-x}{x} < 1$$

$$\text{If } x < 0, \quad 4 - x > x$$

$$2x < 4$$

$$x < 2$$

$$\Rightarrow x < 0 \text{ (satisfies both)}$$

$$\text{If } x > 0, \quad 4 - x < x$$

$$2x > 4$$

$$x > 2$$

$$\Rightarrow x > 2 \text{ (satisfies both)}$$

$$\therefore x < 0 \text{ or } x > 2$$

Solution 2

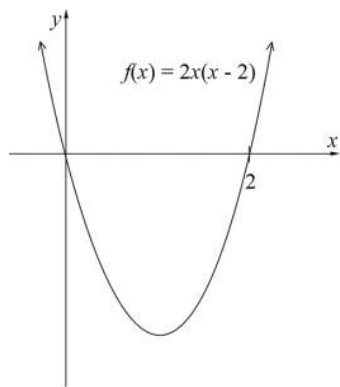

Multiply both sides by x^2

$$x(4-x) < x^2$$

$$4x - x^2 < x^2$$

$$2x^2 - 4x > 0$$

$$2x(x-2) > 0$$

From graph

$$x < 0 \text{ or } x > 2$$

9. Functions, EXT1 F1 2012 HSC 11c

Solution 1

$$\frac{x}{x-3} < 2$$

When $x - 3 > 0$, (i.e. $x > 3$)

$$x < 2(x - 3)$$

$$x < 2x - 6$$

$$\Rightarrow x > 6 \text{ (satisfies both)}$$

When $x - 3 < 0$, (i.e. $x < 3$)

$$x > 2(x - 3)$$

$$x > 2x - 6$$

$$x < 6$$

$$\Rightarrow x < 3 \text{ (satisfies both)}$$

$\therefore$ Equation is correct for $x < 3$ or $x > 6$

Solution 2

$$\frac{x}{(x-3)} < 2$$

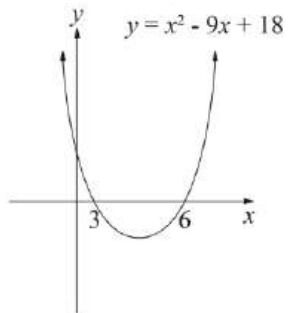

Multiply b.s. by $(x-3)^2$

$$x(x-3) < 2(x^2 - 6x + 9)$$

$$x^2 - 3x < 2x^2 - 12x + 18$$

$$x^2 - 9x + 18 > 0$$

$$(x-3)(x-6) > 0$$

$\therefore$ Equation correct for $x < 3$ or $x > 6$

10. Functions, EXT1 F1 2014 HSC 11e

$$\frac{x^2 + 5}{x} > 6$$

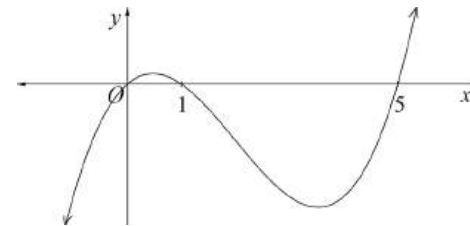

$$x^2 \left(\frac{x^2 + 5}{x} \right) > 6x^2$$

$$x^3 + 5x > 6x^2$$

$$x^3 - 6x^2 + 5x > 0$$

$$x(x^2 - 6x + 5) > 0$$

$$x(x-5)(x-1) > 0$$

$\therefore 0 < x < 1$ or $x > 5$

11. Functions, EXT1 F1 2019 HSC 11b

$$\frac{x}{x+1} < 2$$

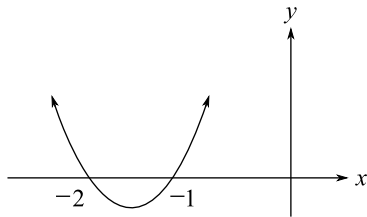

Multiply b.s. by $(x+1)^2$

$$x(x+1) < 2(x+1)^2$$

$$x^2 + x < 2x^2 + 4x + 2$$

$$0 < x^2 + 3x + 2$$

$$0 < (x+2)(x+1)$$

From graph:

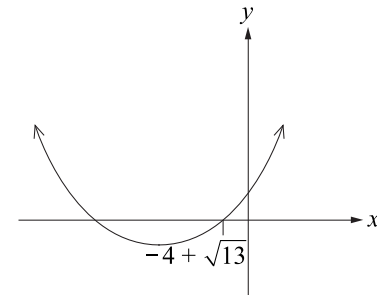

$$x < -2 \text{ or } x > -1$$

12. Functions, EXT1 F1 SM-Bank 1

$$x = \frac{-8 \pm \sqrt{8^2 - 4 \cdot 1 \cdot 3}}{2}$$

$$= \frac{-8 \pm \sqrt{52}}{2}$$

$$= -4 \pm \sqrt{13}$$

$$\{x: x \leq -4 - \sqrt{3} \cup x \geq -4 + \sqrt{3}\}$$

13. Functions, EXT1 F1 SM-Bank 2

Solution 1

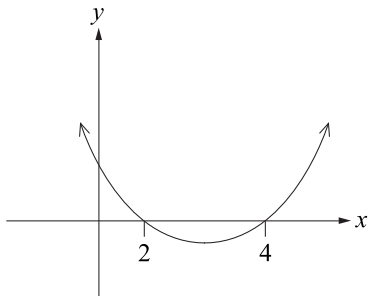

$$\frac{3}{|x-3|} < 3$$

$$|x-3| > 1$$

$$(x^2 - 6x + 9) > 1^2$$

$$x^2 - 6x + 8 > 0$$

$$(x-4)(x-2) > 0$$

$$\therefore \{x: x < 2 \cup x > 4\}$$

Solution 2

$$|x-3| > 1$$

If $(x-3) > 0$, i.e. $x > 3$

$$x-3 > 1$$

$$x > 4$$

$$\Rightarrow x > 4 \text{ (satisfies both)}$$

If $(x-3) < 0$, i.e. $x < 3$

$$-(x-3) > 1$$

$$-x+3 > 1$$

$$x < 2$$

$$\Rightarrow x < 2 \text{ (satisfies both)}$$

$$\therefore \{x: x < 2 \cup x > 4\}$$

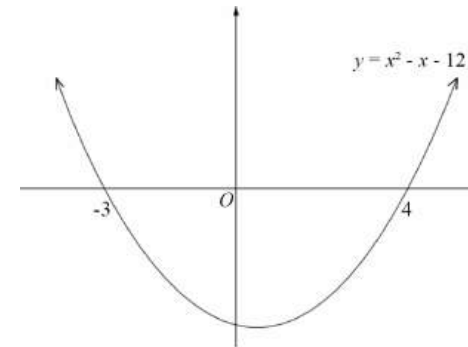

14. Functions, EXT1* F1 2010 HSC 2b

$$x^2 - x - 12 < 0$$

$$\text{Solve } x^2 - x - 12 = 0$$

$$(x-4)(x+3) = 0$$

$$\Rightarrow x = 4 \text{ or } -3$$

$$x^2 - x - 12 < 0$$

$$\text{when } 3 < x < 4$$

MARKER'S COMMENT: Drawing the parabola proved the most efficient way of answering this question for students.

15. Functions, EXT1* F1 2016 HSC 11c

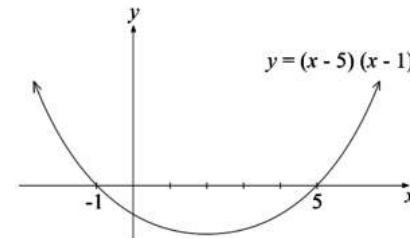

$$|x-2| \leq 3$$

$$(x-2)^2 \leq 3^2$$

$$(x^2 - 4x + 4) \leq 9$$

$$x^2 - 4x - 5 \leq 0$$

$$(x-5)(x+1) \leq 0$$

$$\therefore -1 \leq x \leq 5$$

16. Functions, EXT1 F1 2015 HSC 11c

Solution 1

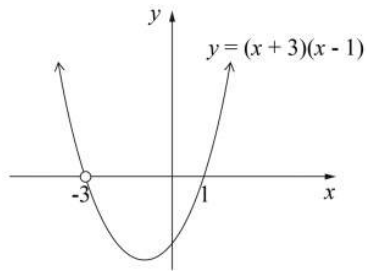

$$\frac{4}{x+3} \geq 1$$

$$4(x+3) \geq (x+3)^2$$

$$4x+12 \geq x^2+6x+9$$

$$x^2+2x-3 \leq 0$$

$$(x+3)(x-1) \leq 0$$

$$\therefore -3 < x \leq 1, x \neq -3$$

Solution 2

$$\text{If } (x+3) > 0$$

$$x > -3$$

$$\frac{4}{x+3} \geq 1$$

$$4 \geq x+3$$

$$x \leq 1$$

$$\therefore -3 < x \leq 1$$

$$\text{If } (x+3) < 0$$

$$x < -3$$

$$\frac{4}{x+3} \geq 1$$

$$4 \leq x+3$$

$$x \geq 1$$

$\therefore$ No solution.

$$\therefore -3 < x \leq 1$$

17. Functions, EXT1 F1 2017 HSC 11c

$$\frac{2x}{x+1} > 1$$

$$\text{If } x+1 > 0, \text{ i.e. } x > -1$$

$$2x > x+1$$

$$x > 1$$

$$\Rightarrow x > 1$$

$$\text{If } x+1 < 0, \text{ i.e. } x < -1$$

$$2x < x+1$$

$$x < 1$$

$$\Rightarrow x < -1$$

$$\therefore x < -1 \text{ or } x > 1$$

18. Functions, EXT1 F1 2009 HSC 1d

Solution 1

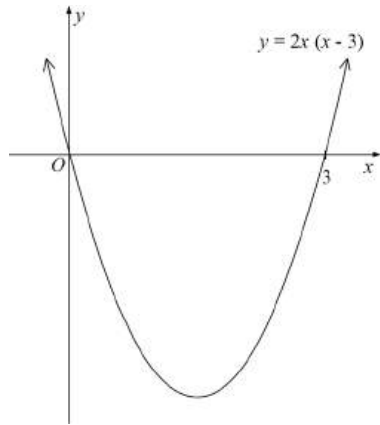

$$(2x)^2 \times \frac{x+3}{2x} > (2x)^2$$

$$2x(x+3) > 4x^2$$

$$2x^2 + 6x > 4x^2$$

$$2x^2 - 6x < 0$$

$$2x(x-3) < 0$$

$$\therefore \{x: 0 < x < 3\}$$

Solution 2

If $x > 0$,

$$x+3 > 2x$$

$$x < 3$$

$$\therefore 0 < x < 3$$

If $x < 0$,

$$x+3 < 2x$$

$$x > 3 \Rightarrow \text{No solution}$$

$$\therefore \{x: 0 < x < 3\}$$

19. Functions, EXT1 F1 2016 HSC 11e

$$\frac{3}{2x+5} - x > 0$$

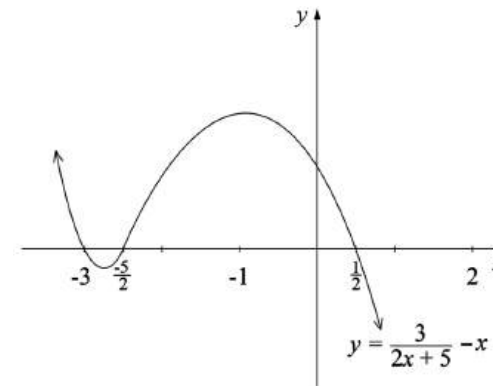

$$3(2x+5) > x(2x+5)^2, \quad x \neq -\frac{5}{2}$$

$$3(2x+5) - x(2x+5)^2 > 0$$

$$(2x+5)[3 - x(2x+5)] > 0$$

$$(2x+5)(-2x^2 - 5x + 3) > 0$$

$$(2x+5)(1-2x)(x+3) > 0$$

$$x < -3, \quad -\frac{5}{2} < x < \frac{1}{2}$$

$$3 - x > \frac{1}{|x - 4|}$$

$$|x - 4|(3 - x) > 1$$

If $x - 4 > 0, x > 4$

$$(x - 4)(3 - x) > 1$$

$$3x - x^2 - 12 + 4x > 1$$

$$-x^2 + 7x - 13 > 0$$

$$\Delta = 7^2 - 4 \cdot 1 \cdot 13 = -3 < 0$$

$\Rightarrow$ No Solutions

If $x - 4 < 0, x < 4$

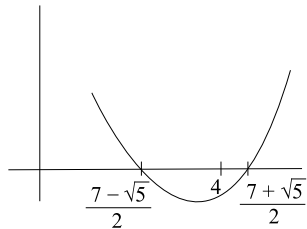

$$-(x - 4)(3 - x) > 1$$

$$x^2 - 7x + 12 > 1$$

$$x^2 - 7x + 11 > 0$$

$$x = \frac{7 \pm \sqrt{7^2 - 4 \cdot 1 \cdot 11}}{2}$$

$$= \frac{7 \pm \sqrt{5}}{2}$$

Combining solutions

$$\left(x < \frac{7 - \sqrt{5}}{2} \cup x > \frac{7 + \sqrt{5}}{2} \right) \cap x < 4$$

$$x \in \left(-\infty, \frac{7 - \sqrt{5}}{2} \right)$$
