

STD 1: Statistical Analysis (Std 1), S1 Data Analysis (Y11)

Other Charts (Std 1)

Teacher: Denis Vlismas

Exam Equivalent Time: 75 minutes (based on HSC allocation of 1.5 minutes approx. per mark)

Std2/Gen2 Exam Contribution History S1 Data Analysis

MS-S1 Data Analysis

IMPORTANT FEATURES AND TIPS FROM EXAM HISTORY

- *MS-S1 Data Analysis* has accounted for 6% and 5% in the 2020 and 2019 *Std1* exams respectively.
- *MS-S1 Data Analysis* is split into the sub-topics listed in the graph above. Note that estimated exam contributions in the graph are taken from Std2/Gen2 past exams due to the very limited Std1 exam history. They should only be used for estimating the "relative" importance of each sub-topic.
- This specific analysis looks at the minor sub-topic *Other Charts*.

ANALYSIS - What to Expect and Common pitfalls

- *Pareto Charts* were not tested in the 2020 *Std1* exam but did appear in 2019 *Std1* paper and caused major problems. Revision attention to this example is recommended.
- The new Std syllabus states generally that students "[need to be able to] ... summarise and interpret grouped and ungrouped data through appropriate graphs."
- [Double] *Stem and Leaf plots* should be carefully reviewed in response to this syllabus requirement. We note this sub-topic has produced sub-50% mean marks the last 4 times it has been examined.
- We believe it is unlikely that examiners will test *Area charts* within the new syllabus, but the generality of the syllabus wording mean we can't guarantee this and it should be briefly covered.
- Other charts that have appeared in past exams (and generally been well-answered) include pie charts, segregated bar charts, step graphs and dot plots.

Questions

1. Statistics, STD2 S1 2014 HSC 1 MC

The step graph shows the cost of telephone calls to China.

Bella made a telephone call at 9.50 pm to a friend in China and spoke to him until 10.07 pm.

How much did this telephone call cost?

- (A) \$4
- (B) \$8
- (C) \$12
- (D) \$16

2. Statistics, STD2 S1 2010 HSC 1 MC

The results of a survey are displayed in the dot plot.

What is the range of this data?

- (A) 7
 - (B) 8
 - (C) 9
 - (D) 10
-

3. Statistics, STD2 S1 2009 HSC 2 MC

The step graph shows the charges for a carpark.

Maria enters the carpark at 10:10 am and exits at 1:30 pm.

How much will she pay in charges?

- (A) \$6
 - (B) \$12
 - (C) \$18
 - (D) \$24
-

4. Statistics, STD2 S1 2004 HSC 8 MC

This sector graph shows the distribution of 116 prizes won by three schools: X, Y and Z.

How many prizes were won by School X?

- (A) 26
 - (B) 32
 - (C) 81
 - (D) 99
-

5. Statistics, STD1 S1 2020 HSC 6 MC

When blood pressure is measured, two numbers are recorded: systolic pressure and diastolic pressure. If the measurements recorded are 140 systolic and 90 diastolic, then the blood pressure is written as 140/90 mmHg.

Blood pressure measurements are categorized as shown in the diagram.

Amy has a blood pressure of 97/76 mmHg and Betty has a blood pressure of 125/75 mmHg.

Which row of the table describes the blood pressure for Amy and Betty?

	<i>Amy's blood pressure</i>	<i>Betty's blood pressure</i>
A.	High	Ideal
B.	Ideal	Ideal
C.	High	Pre-high
D.	Ideal	Pre-high

6. Statistics, STD2 S1 2021 HSC 3 MC

The stem-and-leaf plot shows the number of goals scored by a team in each of ten netball games.

What is the mode of this dataset?

- A. 5
- B. 18
- C. 25
- D. 29

7. Statistics, STD2 S1 2012 HSC 1 MC

A set of 15 scores is displayed in a stem-and-leaf plot.

What is the median of these scores?

- (A) 7
- (B) 8
- (C) 77
- (D) 78

8. Statistics, STD2 S1 2012 HSC 7 MC

The Pi Company has two bakeries. The radar chart displays the monthly sales for the bakeries.

What was the difference in sales in June between the two bakeries?

- (A) \$7.50
- (B) \$17.50
- (C) \$7500
- (D) \$17 500

9. Statistics, STD2 S1 2006 HSC 4 MC

A set of scores is displayed in a stem-and-leaf plot.

What is the median of this set of scores?

- (A) 28
- (B) 30
- (C) 33
- (D) 47

10. Statistics, STD2 S1 2008 HSC 3 MC

The stem-and-leaf plot represents the daily sales of soft drink from a vending machine.

If the range of sales is 43, what is the value of **N** ?

- (A) 4
- (B) 5
- (C) 24
- (D) 25

11. Statistics, STD2 S1 2018 HSC 17 MC

The area chart shows the number of students involved in tennis or cricket at a school over a number of years.

In which year was the number of students involved in tennis equal to the number of students involved in cricket?

- A. 2013
- B. 2014
- C. 2015
- D. 2016

12. Statistics, STD2 S1 2010 HSC 16 MC

This back-to-back stem-and-leaf plot displays the test results for a class of 26 students.

What is the median test result for the class?

- (A) 44
- (B) 46
- (C) 48
- (D) 49

13. Statistics, STD2 S1 2006 HSC 8 MC

Which of these graphs best represents positively skewed data with the smaller standard deviation?

14. Statistics, STD2 S1 SM-Bank 2 MC

The dot plots show the height of students in Year 9 and Year 12 in a school. They are drawn on the same scale.

Which statement about the change in heights when comparing Y9 to Y12 is correct?

- A. The mean increased and the standard deviation decreased.
- B. The mean decreased and the standard deviation decreased.
- C. The mean increased and the standard deviation increased.
- D. The mean decreased and the standard deviation increased.

15. Statistics, STD2 S1 2015 HSC 19 MC

The table shows the life expectancy (expected remaining years of life) for females at selected ages in the given periods of time.

Period of time	Life expectancy for females			
	Remaining years of life			
	at age 0	at age 25	at age 45	at age 65
1965–1967	74.2	51.2	32.3	15.7
1975–1977	76.6	53.1	34.0	17.1
1985–1987	79.2	55.4	36.1	18.6
1995–1997	81.3	57.1	37.7	19.8

In 1975, a 45-year-old female used the information in the table to calculate the age to which she was expected to live. Twenty years later she recalculated the age to which she was expected to live.

What is the difference between the two ages she calculated?

- (A) 2.7 years
- (B) 3.1 years
- (C) 3.7 years
- (D) 5.8 years

16. Statistics, STD1 S1 2019 HSC 7 MC

A school collected data related to the reasons given by students for arriving late. The Pareto chart shows the data collected.

What percentage of students gave the reason 'Train or bus delay'?

- A. 6%
- B. 15%
- C. 30%
- D. 92%

17. Statistics, STD2 S1 2008 HSC 23a

You are organising an outside sporting event at Mathsville and have to decide which month has the best weather for your event. The average temperature must be between 20°C and 30°C, and average rainfall must be less than 80 mm.

The radar chart for Mathsville shows the average temperature for each month, and the table gives the average rainfall for each month.

Average rainfall (mm)

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
(mm)	150	162	86	95	104	140	59	81	60	72	70	90

- i. If you consider only the temperature data, there are a number of possible months for holding the event. Name ONE of these months. (1 mark)
- ii. If both rainfall and temperature data are considered, which month is the best month for the sporting event? (1 mark)

18. Statistics, STD2 S1 2009 HSC 24a

The diagram below shows a stem-and-leaf plot for 22 scores.

- i. What is the mode for this data? (1 mark)
- ii. What is the median for this data? (1 mark)

19. Statistics, STD2 S1 2005 HSC 24d

The sector graph shows the proportion of people, as a percentage, living in each region of Sumcity. There are 24 000 people living in the Eastern Suburbs.

- i. Show that the total number of people living in Sumcity is 160 000. (1 mark)

Jake used the information above to draw a column graph.

- ii. The column graph height is incorrect for one region. Identify this region and justify your answer. (2 marks)

20. Statistics, STD2 S1 2008 HSC 23e

In a survey, 450 people were asked about their favourite takeaway food. The results are displayed in the bar graph.

How many people chose pizza as their favourite takeaway food? (2 marks)

21. Statistics, STD2 S1 2017 HSC 26f

The area chart shows the number of goals scored by three hockey teams, **A**, **B** and **C**, in the first 4 rounds.

- i. How many goals were scored by team **C** in round 1? (1 mark)
- ii. In which round did all three teams score the same number of goals? (1 mark)

22. Statistics, STD2 S1 2007 HSC 24d

Barry constructed a back-to-back stem-and-leaf plot to compare the ages of his students.

Ages of students attending Barry's Ballroom Dancing Studio

Females		Males
9	1	1 2 3
7	2	0 2 2 2 4 5
5	3	0 0 1 7
5 2	4	6 7
3 2 0	5	2
4 4 2 1	6	4 4

- i. Write a brief statement that compares the distribution of the ages of males and females from this set of data. (1 mark)
- ii. What is the mode of this set of data? (1 mark)
- iii. Liam decided to use a grouped frequency distribution table to calculate the mean age of the students at Barry's Ballroom Dancing Studio.
For the age group 30 - 39 years, what is the value of the product of the class centre and the frequency? (2 marks)
- iv. Liam correctly calculated the mean from the grouped frequency distribution table to be 39.5.
Caitlyn correctly used the original data in the back-to-back stem-and-leaf plot and calculated the mean to be 38.2.
What is the reason for the difference in the two answers? (1 mark)

23. Statistics, STD2 S1 2011 HSC 25d

Data was collected from 30 students on the number of text messages they had sent in the previous 24 hours. The set of data collected is displayed.

Male		Female
9 9 8 7 6 5 5 4 2 1	0	8 9
1 1 0 0	1	1 1 2 5 6 8 8 8
0	2	0 1 7
	3	4
	4	
	5	
	6	
1	7	

- i. What is the outlier for this set of data? (1 mark)
- ii. What is the interquartile range of the data collected from the female students? (1 mark)

24. Statistics, STD2 S1 2005 HSC 24a

- i. Draw a stem-and-leaf plot for the following set of scores.
21 45 29 27 19 35 23 58 34 27 (2 marks)
- ii. What is the median of the set of scores? (1 mark)
- iii. Comment on the skewness of the set of scores. (1 mark)

25. Statistics, STD2 S1 EQ-Bank 4

A high school conducted a survey asking students what their favourite Summer sport was. The Pareto chart shows the data collected.

- i. What percentage of students chose Hockey as their favourite Summer sport? (1 mark)
- ii. What percentage of students chose Touch Football as their favourite Summer sport? (1 mark)

26. Statistics, STD2 S1 2013 HSC 26f

Jason travels to work by car on all five days of his working week, leaving home at 7 am each day. He compares his travel times using roads without tolls and roads with tolls over a period of 12 working weeks. He records his travel times (in minutes) in a back-to-back stem-and-leaf plot.

Travel time (minutes)		
Without tolls		With tolls
9	3	5 8 9 9
9 9 8 7 7 6 5 5 4 4 3 2 0	4	0 1 2 6 7 7 8 8 8 9
9 8 7 5 4 3 3 3 2 2 2 2 1 1 0	5	2 4 4 5 6 8 9
1	6	1 3 5 7
	7	0 2 8
	8	2
	9	0

- i. What is the modal travel time when he uses roads without tolls? (1 mark)
- ii. What is the median travel time when he uses roads without tolls? (1 mark)
- iii. Describe how the two data sets differ in terms of the spread and skewness of their distributions. (2 marks)

27. Statistics, STD2 S1 2016 HSC 29c

The ages of members of a dance class are shown in the back-to-back stem-and-leaf plot.

Women		Men
2	3	4 6
4 2	4	2 2 5 6 8
8 8 5 4 0 0	5	3
9 4 3 3	6	3

Pat claims that the women who attend the dance class are generally older than the men. Is Pat correct? Justify your answer by referring to the median and skewness of the two sets of data. (3 marks)

28. Statistics, STD2 S1 EQ-Bank 5

An island resort surveyed 400 guests by asking them on which continent they lived.

The table below shows the data collected.

Continent	Asia	Europe	North America	Australia
Number of guests	168	24	120	88

Complete the Pareto chart below to show the data collected. (3 marks)

Worked Solutions

1. Statistics, STD2 S1 2014 HSC 1 MC

⇒ *D*

2. Statistics, STD2 S1 2010 HSC 1 MC

Range = High – Low

$$= 9 - 0$$

$$= 9$$

⇒ *C*

3. Statistics, STD2 S1 2009 HSC 2 MC

Time in carpark = 3h 20m

From graph, charge will be \$18

⇒ *C*

4. Statistics, STD2 S1 2004 HSC 8 MC

Centre angle of School X sector

$$= 100^\circ \text{ (by measurement)}$$

∴ Prizes won by school X

$$= \frac{100}{360} \times 116$$

$$= 32.22 \dots$$

⇒ *B*

5. Statistics, STD1 S1 2020 HSC 6 MC

Amy: 97/76 is Ideal

Betty: 125/75 is Pre-high

⇒ *D*

6. Statistics, STD2 S1 2021 HSC 3 MC

Mode → data point with highest frequency

$$\text{Mode} = 25$$

⇒ *C*

7. Statistics, STD2 S1 2012 HSC 1 MC

15 scores $\Rightarrow$ Median is 8th

$\therefore$ Median is 78

$\Rightarrow D$

8. Statistics, STD2 S1 2012 HSC 7 MC

Bakery 1 Sales in June = \$17 500

Bakery 2 Sales in June = \$35 000

$\therefore$ Difference in Sales = 35 000 – 17 500
= 17 500

$\Rightarrow D$

9. Statistics, STD2 S1 2006 HSC 4 MC

10 scores

$$\text{Median} = \frac{5\text{th} + 6\text{th}}{2}$$

$$= \frac{28 + 38}{2}$$

$$= 33$$

$\Rightarrow C$

10. Statistics, STD2 S1 2008 HSC 3 MC

Range = High – Low = 43

$\therefore 67 - \text{Low} = 43$

Low = 24

$\therefore N = 4$

$\Rightarrow A$

11. Statistics, STD2 S1 2018 HSC 17 MC

Area Charts are cumulative,

Consider 2015,

Cricket players = 30

Tennis players = 60 – 30 = 30

$\Rightarrow C$

12. Statistics, STD2 S1 2010 HSC 16 MC

26 results given in the data

$\Rightarrow$ Median is average of 13th and 14th

$$\therefore \text{Median} = \frac{45 + 47}{2}$$

$$= 46$$

$\Rightarrow B$

13. Statistics, STD2 S1 2006 HSC 8 MC

By elimination

Positive skew when the tail on the right side is longer.

$\therefore$ NOT B or D

A smaller standard deviation occurs when data is clustered more closely.

$\therefore$ NOT A where data is more widely spread.

$\Rightarrow C$

14. Statistics, STD2 S1 SM-Bank 2 MC

Mean has increased (Y9 to Y12)

The Year 12 data is more tightly distributed around the mean.

$\therefore$ Standard deviation has decreased (Y9 to Y12)

$\Rightarrow A$

♦♦ Mean mark 35%

15. Statistics, STD2 S1 2015 HSC 19 MC

In 1975, her life expectancy

$$= \text{age} + \text{remaining years}$$

$$= 45 + 34$$

$$= 79$$

In 1995, her life expectancy

$$= 65 + 19.8$$

$$= 84.8$$

$$\therefore \text{Difference} = 84.8 - 79$$

$$= 5.8 \text{ years}$$

$$\Rightarrow D$$

◆ Mean mark 39%.

16. Statistics, STD1 S1 2019 HSC 7 MC

Train or bus delay (%)

$$= 92 - 86$$

$$= 6\%$$

$$\Rightarrow A$$

◆◆ Mean mark 4%.

17. Statistics, STD2 S1 2008 HSC 23a

i. One of Feb, Mar, Nov, Dec

ii. November

18. Statistics, STD2 S1 2009 HSC 24a

i. Mode = 78

ii. 22 scores

$\Rightarrow$ Median is the average of 11th and 12th scores

$$\therefore \text{Median} = \frac{45 + 47}{2}$$

$$= 46$$

19. Statistics, STD2 S1 2005 HSC 24d

i. Let the population of Sumcity = P

$$15\% \times P = 24\,000$$

$$\therefore P = \frac{24\,000}{0.15}$$

$$= 160\,000 \dots \text{as required}$$

ii. Western Suburbs population

$$= 10\% \times 160\,000$$

$$= 16\,000$$

The column graph has this population as

12 000 people which is incorrect.

20. Statistics, STD2 S1 2008 HSC 23e

Number of people who chose pizza

$$= \frac{\text{Length of pizza section}}{\text{Total length of bar}} \times 450$$

$$\approx \frac{7}{18} \times 450$$

$$\approx 175$$

$\therefore$ 175 people chose pizza.

COMMENT: This question required measurement of the actual image on the exam. The same methodology works here.

21. Statistics, STD2 S1 2017 HSC 26f

i. Goals by team C = $9 - 5$

$$= 4$$

ii. In Round 3 (all teams scored 2 goals).

22. Statistics, STD2 S1 2007 HSC 24d

i. More males attend than females and a higher proportion of those are younger males, with the distribution being positively skewed. Female attendees are generally older and have a negatively skewed distribution.

ii. Mode = 64 (4 times)

$$\text{iii. Class centre} = \frac{30 + 39}{2}$$

$$= 34.5$$

$$\text{Frequency} = 5$$

$$\therefore \text{Class centre} \times \text{frequency}$$

$$= 34.5 \times 5$$

$$= 172.5$$

iv. The difference in the answers is due to the class centres used in group frequency tables distorting the mean value from the exact data.

23. Statistics, STD2 S1 2011 HSC 25d

i. Outlier is 71

ii. Lower quartile = 9 (4th female data point)

Upper quartile = 20 (11th female data point)

$$\therefore \text{Interquartile range (female)} = 20 - 9 = 11$$

♦♦ Mean mark 34%
COMMENT: Ensure you can quickly and accurately find quartile values using stem and leaf graphs!

24. Statistics, STD2 S1 2005 HSC 24a

i.

Stem	Leaf
1	9
2	1 3 7 7 9
3	4 5
4	5
5	8

ii. 10 scores

$$\therefore \text{Median} = \frac{(5\text{th} + 6\text{th})}{2}$$

$$= \frac{27 + 29}{2}$$

$$= 28$$

iii. The data has a tail that stretches to the right

$\therefore$ Data is positively skewed.

25. Statistics, STD2 S1 EQ-Bank 4

i. Method 1

Percentage who chose hockey

$$= \text{cum freq (at hockey column)} - \text{cum freq (at tennis column)}$$

$$= 100 - 98$$

$$= 2\%$$

Method 2

Column 1 $\rightarrow$ 180 people = 30%

$$\text{Total surveyed} = 180 \div 0.3 = 600$$

$$\therefore \text{Hockey \%} = \frac{12}{600} \times 100$$

$$= 2\%$$

ii. Percentage who chose touch football

$$= \text{cum freq (at touch football column)} - \text{cum freq (at cricket column)}$$

$$= 76 - 54$$

$$= 22\%$$

26. Statistics, STD2 S1 2013 HSC 26f

i. Modal time = 52 minutes

ii. 30 times with no tolls

Median = Average of 15th and 16th

$$= \frac{50 + 51}{2}$$

$$= 50.5 \text{ minutes}$$

♦ Mean mark 36%
MARKER'S COMMENT: Finding a median proved challenging for many students. Take note!

♦ Mean mark 39%

iii. Spread

Times without tolls have a much tighter spread (range = 22) than times with tolls (range = 55).

Skewness

Times without tolls shows virtually no skewness while times with tolls are positively skewed.

27. Statistics, STD2 S1 2016 HSC 29c

Women:

The median is 55 in a data set that is negatively skewed.

Men:

The median is 45 in a data set that is positively skewed.

∴ Pat is correct.

♦ Mean mark 44%.

28. Statistics, STD2 S1 EQ-Bank 5

$$\% \text{ Asia} = \frac{168}{400} = 42\%$$

$$\% \text{ North America} = \frac{120}{400} = 30\%$$

$$\% \text{ Australia} = \frac{88}{400} = 22\%$$

$$\% \text{ Europe} = \frac{24}{400} = 6\%$$
